## Warranty Information

Cabinet Components & Distribution, Inc. warrants its products to be manufactured and delivered free of defects. Tolerances have been built into our DF2 & DF3 fronts to allow for natural movement of the wood. Products not sealed or coated in a reasonable amount of time will not be warranted, as well as products handled improperly by customers. The warranty does not cover installation, labor or travel time and is valid for one year from date of shipment. Due to the natural photosensitive darkening process, we strongly recommend that you finish cherry products immediately upon receipt.

## DRAWER FRONT DESIGNS

See section 3 for door and drawer front profiles
